### About Talking Friends

Talking Friends started thirty years ago in response to concerns that visually impaired people should be able to access Quaker periodicals.

Since then many issues of the Friend, Friends Quarterly and Quaker News have been recorded by enthusiastic volunteers and sent out latterly on memory sticks.

More needs to be done. As more people live to be older, more will be visually impaired and may appreciate Quaker audio material. We are asking Friends with responsibility for oversight or pastoral care to tell anyone who may be interested all about Talking Friends.
