

powering the Quaker
community sustainably

what we offer

100% renewable power as standard

All our electricity comes from 100% certified renewable sources and is produced by our community of over 1400 independent renewable generators across the UK.

Award winning customer service

From the moment you join us, we'll always aim to provide a fantastic experience for your organisation, managed by our expert business customer care team based in Wiltshire.

Help to maximise the benefits of your choice of power

We can help you boost your green appeal with your customers and employees.

We believe we're in a great position to help you improve your sustainability credentials. As an energy company, we've won various awards for our ethical and environmental approach.

2017

why buy renewable?

Whether you've been buying renewable for a while or you're considering this option for the first time, we thought it was worth reinforcing how buying renewable electricity can benefit your organisation.

A positive step towards a cleaner, greener environment

By committing your organisation to 100% renewable electricity you're joining an exclusive community of UK businesses who are supporting the drive towards a low carbon future.

33% of UK electricity was generated from renewable sources in 2018

(Carbon Brief, 2019)

An opportunity to improve your top line

Promoting your choice of 100% renewable power can help broaden your customer base and increase your competitive advantage.

Enhanced sustainability credentials can hugely improve your brand perception; not just with customers but also with your supply chain.

55% of adults in the UK are more likely to choose a brand that uses electricity from renewable sources

(YouGov, 2017)

Helping you develop a sustainable work culture

Buying renewable creates a great opportunity to engage with your people – a real plus point in demonstrating your organisation's values and how you're making a positive impact.

62% of millennials want to work for a company that wants to make a positive impact

(Global Tolerance, The Values Revolution 2015)

about good energy

Good Energy is a pioneering clean energy company, powering the choice of a cleaner, greener future together with its people, customers and shareholders.

Having led the way in renewable energy development since 1999 in areas including small and larger scale wind turbines, solar panels, biogen and hydro, and now in technologies like battery storage and electric vehicles, Good Energy is making it easier for people and businesses to make renewable energy part of their lives.

Good Energy matches every unit of power that their domestic and business customers use with a unit of 100% renewable electricity sustainably sourced from its community of 1,400 UK renewable generators. In addition, Good Energy offers a green gas product which contains 6% biomethane – gas produced here in the UK from food waste.

To make it completely carbon neutral, emissions from the rest of the gas its customers use is balanced through supporting verified carbon-reduction schemes in Malawi, Vietnam and Nepal.

“ We are committed to building a cleaner greener future together and our community of business customers are at the heart of this”

founder and CEO of Good Energy

where our electricity comes from

Making UK electricity cleaner and greener

We source our electricity from a community of over 1,400 British independent generators across the UK. So the more customers we have, the more clean power we have to buy from this community. We commit to paying them a fair price, which helps grow the market for renewable power, something that's only possible with the support of our customers.

Gold standard renewables

Businesses that purchase their power from Good Energy are able to report zero carbon emissions under the GHG Protocol. For extra peace of mind we have our renewable power audit trail assured each year by SGS.

what makes up your power price?

We believe in being straightforward in everything we do. That's why we have detailed here what goes into determining the cost inputs that make up the price of electricity.

So what is included?

Below are a number of different costs which make up the price of each unit of energy. These costs are industry averages, based on data supplied by the largest six energy suppliers.

- Wholesale costs - 33.5%
- Network costs - 25.5%
- Environmental and social obligation costs - 17.5%
- Operating costs - 17.2%
- VAT - 4.8%
- Other direct costs - 1.5%

what can you expect from the Quaker energy scheme?

With Good Energy your business can expect:

Preferential prices for all meeting houses and organisations

12 or 24 month fixed term contracts available

Payment terms of up to 28 days as standard and more than 28 days on request

100% renewable electricity (from certified UK generators) and carbon neutral gas

Energy survey and sustainability advice service available

EV charging infrastructure options

Onsite generation and battery storage solution advice available

Award winning customer care from our experienced team based in Wiltshire

Display certificates and marketing collateral promoting your organisation's commitment to sustainability

Discount scheme for your friends and family to help make the switch to renewable power

a final word from the Head of Operations, Britain Yearly Meeting

"Good Energy's record of investment in clean, green and nuclear free energy from local generation providers makes them a leading choice. Good Energy is already providing 100% renewable power to many of our meeting houses including Friends House and Swarthmoor Hall. Together we have developed the Quaker Energy Scheme making it easier and more accessible than ever before. You can expect preferential terms and many other benefits, but mainly the scheme enables us to become a low carbon, sustainable community. Together we can reduce our impact upon the world."

Paul Grey – Head of Operations, Britain Yearly Meeting
